

ENVIRONMENT AND SAFETY POLICY

L&L PRODUCTS is a company specializing in the design, manufacturing, sale, storage and shipping of plastic parts for sealing, bonding, structural reinforcement and acoustic solutions for AEROSPACE, AUTOMOTIVE and COMMERCIAL VEHICLES.

With, as initial commitments, compliance with the requirements of the Labor Code, the Environmental Code applicable to our business, our prefectural order, our spill authorization and the prevention of any pollution related to our activity, our environmental policy in 2018, based on the ISO 14001 v2015 standard, is organized as follows:

- **Environment and general interest:**

- Reduce the quantity of waste produced
- Increase the recoverable part of our waste and aim the zero waste buried.
- Reduce our power consumption
- Reduce our carbon emission

- **Safety and working conditions of our employees :**

- Ensure a safe environment and develop responsible behaviors to achieve our goal of 0 accidents
- Create an environment where you feel good: indoor air quality, noise reduction program, organized workspace...
- Frame product safety throughout the life cycle
- Maintain good relations with our institutional partners

More generally, an exemplary behavior of each is expected in accordance with the values of the company, to make of L&L PRODUCTS, a company where the customer satisfaction is closely linked with the respect of its environment and with the safety and health of his staff.

Management makes, besides, a commitment to supply the financial and human means to achieve these goals.
